

NORTH FRINGE INDUSTRIAL TECHNOLOGIES NAMED SAFE EMPLOYER AWARD FINALIST FOR *SECOND* CONSECUTIVE YEAR

Work to live.

FOR IMMEDIATE RELEASE

Nipawin, SK (April 2, 2026) – [North Fringe Industrial Technologies](#) has once again been named a finalist for the [2026 Safe Employer Award](#) presented by [WorkSafe Saskatchewan](#), marking the second consecutive year the company has received this recognition.

This repeat recognition reflects a safety culture embedded across North Fringe’s operations, from Saskatchewan to worksites across Canada. The award recognizes employers that demonstrate leadership in workplace safety, evaluated through safety culture, leadership engagement, training, prevention, and return-to-work outcomes.

North Fringe works across municipal infrastructure, industrial sites, and mining operations, where conditions are demanding and there is often little margin for error. Safety comes down to the people doing the work and the decisions they make every day, often in environments where conditions can change quickly and there’s no room for shortcuts.

“This recognition is a credit to our team and the standard they bring to every job,” said Brett Cain, President of North Fringe Industrial Technologies. “Safety comes down to the people doing the work and the responsibility they take in how it gets done.”

North Fringe's safety program is built around a certified [COR safety management system](#) and supported by daily jobsite hazard assessments, role-based training, and employee-led safety initiatives across all divisions. The company has also been recognized as Saskatchewan's first private training provider approved to deliver WorkSafe's Occupational Health Committee Level 1 course, further supporting its commitment to developing safe, capable teams.

Operating across Canada, North Fringe supports critical industries including mining, oil and gas, construction, municipal water and wastewater, and agriculture with industrial pump and equipment sales and rentals, pump repair services, and dredging and dewatering solutions. With a reputation for responsive service, the company supports customers in environments where safety, reliability, and performance are essential.

North Fringe will be exhibiting at the upcoming [Saskatchewan Mining Supply Chain Forum](#), presented by [SIMSA](#) on April 15 – 16 at Prairieland Park in Saskatoon, where the team will be available at Booth 248–249 to meet with customers, partners, and industry peers.

In addition, North Fringe will be hosting a customer and partner appreciation event on the evening of April 15. Those interested in attending are encouraged to reach out directly to Lisa Fast at lfast@northfringe.com for more information.

The 2026 WorkSafe Saskatchewan Safe Employer Award winner will be announced at the WCB Compensation Institute in Regina on May 12, 2026. To learn more about North Fringe Industrial Technologies or to discuss an upcoming project, visit www.northfringe.com or call 306-862-5900.
