

## NORTH FRINGE INDUSTRIAL TECHNOLOGIES HONOURED WITH SASKATCHEWAN'S 2026 WORKSAFE SAFE EMPLOYER AWARD

*Work to live.*

### FOR IMMEDIATE RELEASE

**Nipawin, SK** (May 14, 2026) – [North Fringe Industrial Technologies Inc.](#) has been named the recipient of the 2026 [WorkSafe Saskatchewan Safe Employer Award](#), recognizing the company's commitment to workplace safety, employee engagement, and continuous improvement across its operations.

The award was presented during the Saskatchewan Workers' Compensation Board [Compensation Institute](#) in Regina and recognizes employers that demonstrate outstanding leadership in workplace health, safety, and well-being. This marks the second consecutive year North Fringe has been recognized as a finalist for the provincial award, after also being named a finalist in 2025.

Headquartered in Nipawin, Saskatchewan, North Fringe provides pumping, dredging, dewatering, and water management solutions to customers across Canada, supporting critical mining, industrial, municipal, and infrastructure operations where safety and reliability are essential. From mine dewatering systems to emergency response and water infrastructure support, the company often operates in demanding environments where safe work practices are critical to both employees and customers.

According to WorkSafe Saskatchewan, North Fringe was recognized for building a strong safety culture rooted in training, communication, employee ownership, and consistent safe work practices.

“Safety has to be more than policies and paperwork. It has to become part of how people think and work every day,” said Brett Cain, President of North Fringe Industrial Technologies Inc. “This recognition belongs to our entire team across every department, from our repair shop and field services teams to our office staff. Our people are the reason we continue to strengthen our culture and improve how we work.”

Over the past several years, North Fringe has continued investing in safety systems, training, operational accountability, and employee involvement across all branches and divisions of the company. The organization achieved COR certification in Saskatchewan and continues to focus on creating safer work environments while supporting customers in high-risk industries, including mining, municipal infrastructure, and industrial operations.

“We’re proud of this recognition, but more importantly, we’re proud of the culture our team continues to build,” said Cain. “Our employees look out for each other, speak up when something isn’t right, and take ownership in making the workplace safer for everyone.”

The 2026 Safe Employer Award finalists also included [Allan Construction](#) and [Abco Elevator](#). North Fringe extends its congratulations to both organizations and recognizes the important work being done across Saskatchewan to build safer workplaces.
